JAVASCRIPT DEVELOPER

JOB DESCRIPTION

Overview

Bluegrass Digital is a leading digital production agency, working with both South African and International client accounts. We are looking for a mature Frontend web developer to join us. You will be energetic; passionate about using the latest technologies; and eager to grow your skills by working complex responsive website projects, HTML5 apps, API integrations. You will work on some big brand names, some small brand names, build some cool projects and have fun all the way giving you exposure to the latest technologies being used on the web today.

JOB DESCRIPTION

This exciting opportunity are for those that love the world of Javascript and working on the latest frameworks like AngularJS, Node, React and more! If you are passionate on building web and mobile application and looking to expand your skills, please get in touch.

WHO WE ARE

Bluegrass Digital is a software engineering company working with forward thinking companies and partners in the London, New York and Africa. You will work in a strong and passionate team working with the latest technologies, striving to deliver quality code.

WHAT WE DO

We develop medium to enterprise web and mobile projects. We work with platforms such as Umbraco, Episerver, Sitecore, Drupal and Wordpress as well as creating cutting-edge custom applications web and mobile products.

WHO WE ARE LOOKING FOR (Javascript; React Native and Mobile developers)

We're looking for a strong front-end or full stack developers with strong Javascript knowledge. You must be driven by quality and standards, excited by challenging projects in a dynamic development environment.

You must be willing to learn new skills and participate in team innovation and knowledge sharing. Be prepared to take on any challenge head-on and have a problem-solving attitude.

SKILLS AND EXPERIENCE REQUIRED

- Minimum of 3-5+ years' experience in web and/or mobile development

- JavaScript (ES5 and ES6+), HTML and CSS (including SASS and/or LESS) essential

- Experience with more than one JS framework/library essential (e.g. React, Vue, Angular 1/2+ etc.)

- Node, Express beneficial

- React, Redux and React Native extremely beneficial

- JavaScript related tooling (webpack, gulp, npm, babel, yarn etc.) essential

- On top of the fast changing JS world

- Version control systems (git, mercurial) and platforms (bitbucket, github, gitlab)

- Experience delivering projects from designs and functional specs through to production

- Slicing up designs and extracting assets from PSDs/Sketch files

- High level of attention to detail, both in matching a design and ensuring a smooth user experience

- Experience working with RESTful APIs

- Happy to mentor and grow self-motivated less experienced team members

PERSONAL SKILLS / ATTRIBUTES

- A code lover, with interesting hobby projects, open source contributions or proven talent through great work experience & results

- Multi-tasking skills & ability to comfortably juggle multiple requirements

- Energetic and eager to build some cool software

- Honest & ethical

- Punctual & professional

- Creative thinker

- Excellent communication skills, with the ability to express yourself well to clients (if required)

- A proven early adopter & researcher of new technologies

- Excellent troubleshooting and problem solving skills

- Team player and not afraid of a bit of hard-work and fun with colleagues
